### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the prior art does not teach or fairly suggest, in a method of blow molding crystalline thermoplastic resin parison, the steps of blowing and shaping the parison at a mold temperature between (the crystallization point of the resin minus 10°C) and the melting point of the resin; cooling the blown parison at a temperature between (the crystallization point of the resin minus 15°C) and (the crystallization point of the resin minus 45°C); and keeping the blown parison for a dwell time between 30 and 300 seconds. The closest prior art is Koizumi et al. (US Patent 6,423,263) which teaches blowing a crystalline resin parison, removing the blown parison from the mold, heating the blown parison in a heat treating apparatus and cooling it, wherein the heating temperature ranges from between -20°C and +30°C from the crystallization temperature. Koizumi et al. does not teach a dwell time of between 30 and 300 seconds.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Suzanne E. McDowell whose telephone number is (571) 272-1205. The examiner can normally be reached on M-F 6:30-4.
